-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of the invention of group II, species XII, figure 12, claims 21-26, 29 and 30 in the reply filed on 8/23/04 is acknowledged. The traversal is on the ground(s) that claims 27, 28, 31 and 32 are to be examined. This is not found persuasive because the elected species XII, figure 12 does not comprise a stent.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-20, 27, 28, 31-38 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 21 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Hillstead 5116318. Hillstead discloses a balloon having a central portion and a plurality of wings including at least one first wing wrapped in a first direction about the central portion of the balloon and at least one second wing wrapped in a second direction opposite the first direction about the central portion of the balloon. See figures 4 and 8.

Art Unit: 3731

2. Claims 21-24,26,29,30 are rejected under 35 U.S.C. 102(e) as being anticipated by Whalen et al. 2002/0107540. Whalen discloses a balloon having a central portion and a plurality of wings including at least one first wing wrapped in a first direction about the central portion of the balloon and at least one second wing wrapped in a second direction opposite the first direction about the central portion of the balloon. Whalen also teaches a plurality of first wings, a plurality of second wing, and T-shaped structures 261. See figures 4 and 4a.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Whalen et al. 2002/0107540 in view of Butaric et al. 6033380. Whalen discloses the invention as claimed except for an overlapping relationship between the first wing and the adjacent second wing. However, Butaric discloses a balloon 50 comprising a plurality of wings 70 overlapping with each other. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to modify Whalen by having the wing overlapping with the second wing in view of Butaric to facilitate removal
